About Us

The industry experience your business needs.

Crest Insurance was founded in 2010 by a group of seasoned insurance professionals with the purpose of putting the customer first. Crest's Senior Partners and Management came together from competing firms and vowed that integrity, customer service, and professionalism would come before anything else. We were formed on the principles of providing our clients with exceptional risk management, being active in our communities, and building an agency focused on the value of our employees.

With over 180 employees, Crest Insurance has offices throughout the Southwest and holds licenses in all 50 states.

Advantages

Our services are the difference.

We strive to educate job site workers and management through a vast selection of industry related trainings. We believe our consultative approach can help minimize the hazards our clients may face.
